## OPENING SESSION

*Chair: G.P. Martelli*

	PAGE
<b>R. Bovey and P. Gugerli</b> <i>A short ICVG history</i>	1
<b>Plenary lecture</b> <b>G.P. Martelli</b> <i>Grapevine virology highlights 2000-2003</i>	3
<b>SESSION 1 - New viruses/new data on known viruses</b>	
<i>Chair: R. Bovey</i>	
<b>Oral</b>	
<i>Shedding new light on Grapevine fanleaf virus replication</i> P. Pfeiffer, C. Ritzenthaler, C. Laporte, R. El Amawi, A. Tarasov and C. Stussi-Garaud	11
<i>Grapevine fanleaf virus movement protein traffics along the secretory pathway and the cytoskeleton for its proper targeting to plasmodesmata</i> C. Laporte, C. Ritzenthaler, G. Vetter, A-M. Loudes, D.G. Robinson, S. Hillmer and C. Stussi-Garaud	12
<i>Structure of a population of Grapevine fanleaf virus isolates from a Chardonnay vineyard in the Champagne region of France: evidence for mixed infection and recombination</i> E. Vigne, V. Komar, M.C. Mauro and M. Fuchs	13
<i>Two hitherto undescribed nepoviruses from Turkish grapevines</i> M. Digiario, N. Abou Ghanem-Sabanadzovic, I. Cigsar, K. Gokalp, A. De Stradis, D.Boscia and G.P. Martelli	14
<i>Molecular characterisation of two German Raspberry ringspot virus isolates infecting grapevine and construction of full-length infectious clones</i> R. Ebel, A. Schnabel, G. M. Reustle, G. Krczal and T. Wetzell	16
<i>First record of Cherry leaf roll virus in grapevine in Germany</i> U. Ipach, L. Kling and D. Lesemann	17
<i>The etiology of a new virus disease:grapevine angular mosaic</i> S.M. Girgis, F.P. Bem, P.E. Kyriakopoulou, C.I. Dovas, A. Avgelis and N.I.Katis	19
<i>Raspberry bushy dwarf virus infection of grapevine in Slovenia</i> I. Mavrič, M. Viršček Marn and I. Žezlina	20
<b>Poster 01</b>	
<i>Effect of Grapevine fanleaf virus, Grapevine leafroll-associated virus 3 and Grapevine fleck virus on leaf morphology of the Portuguese cv. Arinto by multivariate discriminant analysis</i> M.T. Santos, M.L.G. Rocha, J.M.S. Martins and L.C. Carneiro	21
<b>Poster 02</b>	
<i>3'end-proximal genome organization of the three Grapevine fleck virus-like viruses</i> S. Sabanadzovic, N. Abou Ghanem-Sabanadzovic and G.P. Martelli	23
<b>Poster 03</b>	
<i>Isolation, sequencing and expression of genes of Chilean isolates of Grapevine fanleaf virus</i> E. Engel, V. Arredondo, R. Martinez, N. Fiore, L.O. Burzio and P.D.Valenzuela	24
<b>SESSION 2 - Leafroll and related viruses</b>	
<i>Chair - A. Rezaian</i>	
<b>Plenary lecture</b> <b>P. Gugerli</b> <i>Grapevine leafroll and related viruses</i>	25

<b>Oral</b>	<b><i>A solution to an enigma: why diseased grapevines react with antisera to potyviruses</i></b> I. Sela and E. Tanne	<b>32</b>
	<b><i>Molecular characterization of Grapevine leafroll-associated virus 9, a new closterovirus associated with grapevine leafroll disease complex</i></b> R. Alkowni and A. Rowhani	<b>33</b>
	<b><i>Identification and characterization of a putative new ampelovirus species associated to grapevine leafroll</i></b> P. Cornuet, P. Andret, E. Vigne and M. Fuchs	<b>34</b>
	<b><i>Gene function analysis and improved detection of Grapevine leafroll-associated virus 1</i></b> A. Little and M.A. Rezaian	<b>35</b>
	<b><i>Molecular polymorphism in three open reading frames of Grapevine leafroll-associated virus 2 variants detected by heteroduplex mobility assay (HMA)</i></b> N. Bertazzon, E. Angelini and M. Borgo	<b>36</b>
	<b><i>Preliminary investigations of genetic variability of Grapevine leafroll-associated virus 3 isolates</i></b> C. Turturo, P. Saldarelli, D. Yafeng, M. Digiario, V. Savino and G.P. Martelli	<b>38</b>
	<b><i>Leafroll virus movement in newly infected grapevine</i></b> D. Cohen, R. van den Brink and N.Habili	<b>39</b>
<b>Poster 04</b>	<b><i>Detection of Grapevine leafroll-associated virus 3 in rootstocks</i></b> M. Cid, C. Cabaleiro and A. Segura	<b>41</b>
<b>Poster 05</b>	<b><i>Partial molecular characterization of Grapevine leafroll-associated virus 4</i></b> N. Abou Ghanem-Sabanadzovic, S. Sabanadzovic, G. Roy and A. Rowhani	<b>42</b>
<b>Poster 06</b>	<b><i>A survey for Closteroviridae family members in Argentinean vineyards</i></b> G.S. Gómez Talquenca, O. Gracia, S. García Lampasona and O. Grau	<b>43</b>
<b>Poster 07</b>	<b><i>Evaluation of in vitro-stress inducing as a method for leafroll indexing</i></b> G. Grammatikaki and A. Avgelis	<b>45</b>

### **SESSION 3 – Phytoplasmas**

**Chair: G. Belli and M. Maixner**

	<b>Plenary lecture</b> <b>E. Boudon Padiou</b> <b><i>The situation of grapevine yellows and current research directions: distribution, diversity, vectors, spreading and control</i></b>	<b>47</b>
<b>Oral</b>	<b><i>Construction of phytoplasmal genomic libraries and characterization of phytoplasmal genes</i></b> S. Melamed, E.Tanne, R. Ben-Haim, O. Edelbaum, D. Yogev and I. Sela	<b>54</b>
	<b><i>Identification of phytoplasmas infecting grapevine by ligase detection reaction and universal array</i></b> P.A.Bianco, A. Frosini, P.Casati and G. De Bellis	<b>55</b>
	<b><i>Real-time PCR detection of Bois noir and Flavescence dorée from field collected symptomatic grapevines</i></b> C. Marzachi, L. Galetto and D. Bosco	<b>56</b>
	<b><i>Biology and epidemiology of Australian grapevine phytoplasmas</i></b> F.E. Constable, K.S. Gibb, J.W. Randles and R.H. Symons	<b>58</b>
	<b><i>Identification of a grapevine Flavescence dorée-C phytoplasma and two deletion mutants in Clematis</i></b> E. Angelini, F. Squizzato, G. Lucchetta and M. Borgo	<b>60</b>

	<i>Molecular variability in Flavescence dorée phytoplasmas as marker for the disease outbreaks in vineyards</i>	62
	S. Botti and A. Bertaccini	
	<i>Possible insect vectors of North American grapevine yellows phytoplasma in Virginia</i>	64
	L. Beanland and T. Wolf	
	<i>Characterization of isolates of Vergilbungskrankheit phytoplasma by RFLP-analysis and their association with grapevine, herbaceous host plants and vectors</i>	66
	M. Langer, H. Darimont and M. Maixner	
	<i>Roguing: a controversial practice to eradicate grape yellows caused by phytoplasmas</i>	68
	R. Osler, L. Carraro, P. Ermacora, F. Ferrini, N. Loi, A. Loschi, M. Martini, P.B. Mutton and E. Refatti	
	<i>Hot water treatment: curing efficiency for phytoplasma infection and effect on plant multiplication material</i>	69
	V. Tassart-Subirats, D. Clair, S. Grenan, E. Boudon-Padieu and J. Larrue	
	<i>Australian advances in hot water treatment research</i>	71
	J. Crocker, P. Wright, P. Deverell and H. Waite	
	<i>Effect of rootstock on grapevine yellows – Facts and explanations</i>	73
	R. Sharon, P. Weintraub and T. Zahavi	
	<i>Presence of grapevine yellows phytoplasmas vectors (Homoptera, Auchenorrhyncha) in northwestern Italy</i>	75
	F. Lessio, S. Palermo, R. Tedeschi and A. Alma	
	<i>An internal positive control in PCR-tests for the detection of phytoplasma in plants and insects</i>	77
	Q. Ge and M. Maixner	
Poster 08	<i>Detection and identification of phytoplasmas belonging to 16SrV-D in Scaphoideus titanus adults in Portugal</i>	78
	E. De Sousa, F. Cardoso, P. Casati, P.A. Bianco, M. Guimarães and V. Pereira	
Poster 09	<i>Phytoplasma [stolbur-subgroup (Bois noir-BN)] induced changes on pigments, RuBPC and electron transport activities in field grown grapevine (Vitis vinifera L. cv. Chardonnay)</i>	79
	M. Bertamini and N. Nedunchezian	
Poster 10	<i>Genomic diversity of the Flavescence dorée phytoplasma</i>	81
	F.E. Constable and E. Boudon-Padieu	
Poster 11	<i>Direct sensitive diagnosis of Flavescence dorée and Bois noir using a multiplex nested-PCR assay and its use in field surveys</i>	82
	D. Clair, J. Larrue, G. Aubert, J. Gillet, G. Cloquemin and E. Boudon-Padieu	
Poster 12	<i>Genetic variability and distribution of grapevine phytoplasmas of group 16Sr-V in Lombardia (northern Italy)</i>	84
	P.A. Bianco, F. Quaglino, P. Casati and M. Calvi	
Poster 13	<i>Survey on phytoplasmas identified in Chilean grapevines</i>	85
	A. Gajardo, S. Botti, J. Montealegre, N. Fiore and A. Bertaccini	
Poster 14	<i>Molecular characterization and geographical distribution of FD-phytoplasmas in Spain</i>	87
	E. Torres, S. Botti, J. Rahola, V. Blanco, M.P. Martin and A. Bertaccini	
Poster 15	<i>Identification of phytoplasmas associated with grapevine yellows in Abruzzo region (Italy)</i>	89
	D. D'ascenzo, S. Botti, S. Paltrinieri, R. Di Giovanni, D. Di Silvestro and A. Bertaccini	
Poster 16	<i>Molecular characterization of a Flavescence dorée phytoplasma infecting grapevine in Serbia</i>	91
	B. Duduk, S. Botti, M. Ivanovic, N. Dukic and A. Bertaccini	

<b>Poster 17</b>	<b><i>Phytoplasmas on grapevine in Serbia</i></b> S. Kuzmanovic, M. Starovic, M. Tomic, S. Stojanovic and T. Tomic	<b>93</b>
<b>Poster 18</b>	<b><i>Grapevine yellows – spread of the disease in Croatia</i></b> M. Ćurković Perica, M. Šeruga, B. Kozina, M. Krajačić and D. Škorić	<b>95</b>
<b>Poster 19</b>	<b><i>Comparison of stolbur phytoplasma isolates from Croatian grapevine by analyses of ribosomal and non-ribosomal gene regions</i></b> M. Šeruga, D. Škorić, B. Kozina, M. Ćurković Perica and M. Krajačić	<b>96</b>
<b>Poster 20</b>	<b><i>The presence of grapevine yellows and their potential natural vectors in wine-growing regions of Slovenia</i></b> N. Petrovic, G. Seljak, G. Matis, J. Miklavc, K. Beber, J. Boben and M. Ravnikar	<b>97</b>
<b>Poster 21</b>	<b><i>Six-year survey of grapevine yellows distribution in Hungary</i></b> M. Kölber, I. Ember, K. Varga, S. Botti, M. Martini, J. Lázár and A. Bertaccini	<b>99</b>
<b>Poster 22</b>	<b><i>Grapevine “Bois noir” disease in Lebanon</i></b> E. Choueiri, F. Jreijiri, S. El Zammar, E. Verdin, P. Salar, J.L. Danet, J. Bové and M. Garnier	<b>101</b>
<b>Poster 23</b>	<b><i>Occurrence of grapevine yellows and potential vectors in Tunisia</i></b> N. Chabbouh, S. Bouhachem, S. Mh'irsi, N. Mahfoudhi, N. Marzouki and M. Marrakchi	<b>103</b>
<b>Poster 24</b>	<b><i>Survey on Bois noir phytoplasmas spreading in vineyards of Modena province (Italy)</i></b> A. Bertaccini, N. Mori, S. Botti, A. Castiglioni, G. Cavallini and A. Malossi	<b>104</b>
<b>Poster 25</b>	<b><i>Bois noir in Trentino vineyards: twelve years visual observations and research about roots analysis</i></b> A. Ciccotti, L. de Sutter, D. Gurioli, E. Mescalchin, M.E. Vindimian	<b>106</b>
<b>Poster 26</b>	<b><i>Seasonal probability of Flavescence dorée phytoplasma transmission in relation to abundances of leafhopper vectors and source for acquisition</i></b> A. Bressan, S. Spiazzi, C. Capuzzo, V. Girolami and E. Boudon Padieu	<b>107</b>
<b>Poster 27</b>	<b><i>Comparative experimental transmission of grapevine yellows phytoplasmas to plants and artificial feeding medium</i></b> Q. Ge and M. Maixner	<b>109</b>
<b>Poster 28</b>	<b><i>Quick and reliable methods to detect Flavescence dorée and Bois noir phytoplasmas in field collected insect vectors</i></b> S. Palermo, R. Tedeschi, C. Marzachi and A. Alma	<b>111</b>
<b>Poster 29</b>	<b><i>Potential vectors of grapevine Bois noir phytoplasma in Spain and evaluation of their transmission capacity</i></b> J. Sabaté, A. Laviña and A. Batlle	<b>113</b>
<b>Poster 30</b>	<b><i>A novel approach to studying the phytoplasma genome</i></b> S. Melamed, E. Tanne, R. Ben-Haim, O. Edelbaum, D. Yogev and I. Sela	<b>114</b>
<b>Poster 31</b>	<b><i>Seasonal fluctuation and detection of stolbur phytoplasma in grapevine</i></b> A. Laviña, J. Sabaté, M. García and A. Batlle	<b>115</b>

## **SESSION 4 - Rugose wood and related viruses**

**Chair: E. Tanne**

	<b>Plenary lecture</b>	
	<b>A. Minafra and D. Boscia</b>	
	<b><i>An overview on Rugose wood-associated viruses: 2000-2003</i></b>	<b>116</b>
<b>Oral</b>	<b><i>Functional analysis of the Grapevine virus A genome</i></b> N. Kaliakparov, E. Tanne, I. Sela and R. Gafny	<b>120</b>

	<b><i>RNA silencing is suppressed by Grapevine virus A infection</i></b>	
	C. Turturo, M. Dell'Orco, P. Saldarelli, A. Minafra and L. Stalolone	121
	<b><i>Preliminary evidence of the presence of defective interfering RNAs in vitivirus-infected Nicotiana plants</i></b>	
	J. Obreque, A. Minafra, C. Turturo, M. Dell'Orco, P. Saldarelli, D. Diaz, J. Vera, M. Jashes, H. Peña-Cortés and G.P. Martelli	122
	<b><i>Detection of fragmented Grapevine rupestris stem pitting-associated virus genome in Vitis rupestris 'St. George' rootstock using a modified PCR method</i></b>	
	S. Masri, H. Rast, R. Johnson and A. Rowhani	124
	<b><i>Genomic study of two Grapevine rupestris stem pitting-associated virus-like isolates</i></b>	
	M.F. Lima, R. Alkowni, A. Rowhani, J.K. Uyemoto, D.A. Golino and A.S. Renault-Spilmont	125
	<b><i>Analysis of the genomic variability and design of an asymmetric PCR ELISA assay for the broad detection of Grapevine rupestris stem pitting-associated virus</i></b>	
	C. Santos, M.T. Santos, I. Cortéz, J. Boben, N. Petrovic, A.N. Pereira, O.A. Sequeira and G. Nolasco	126
	<b><i>First detection of Rupestris stem pitting-associated virus particles by antibody to a recombinant coat protein</i></b>	
	N. Petrovic, B. Meng, M. Ravnikar, I. Mavric and D. Gonsalves	128
<b>Poster 32</b>	<b><i>Further data on molecular characterization of Grapevine rupestris stem pitting associated virus</i></b>	
	P. Casati, A. Minafra, A. Rowhani and P.A. Bianco	130
<b>Poster 33</b>	<b><i>Identification of grapevines infected with divergent variants of Grapevine virus A using variant-specific RT-PCR</i></b>	
	D.E. Goszczynski and A.E.C. Jooste	131
<b>Poster 34</b>	<b><i>Partial molecular characterization of Italian Grapevine rupestris stem pitting associated virus isolates</i></b>	
	F. Terlizzi and R. Credi	133
<b>Poster 35</b>	<b><i>Analyses of grapevine viruses in association with Rugose wood disease</i></b>	
	I. Tomazic, N. Petrovic, D. Gonsalves and Z. Korosec-Koruza	135

## **SESSION 5 - Emerging diseases**

**Chair: J. Uyemoto**

	<b>Plenary lecture</b>	
	<b>D.A. Golino</b>	
	<b><i>Emerging grapevine diseases</i></b>	136
<b>Oral</b>	<b><i>Discovery of different grapevine sources with graft-transmissible agents causing union-incompatibility on sensitive rootstocks</i></b>	
	J.K. Uyemoto and A. Rowhani	139
	<b><i>Molecular studies on a graft incompatibility syndrome in New Zealand vineyards yields another probable variant of Grapevine leafroll-associated virus 2</i></b>	
	R. Bonfiglioli, F. Edwards and A. Pantaleo	141
	<b><i>Aetiology of decline in Thompson seedless grafted table grape plants</i></b>	
	S. Prodan, J. Montealegre and N. Fiore	142
	<b><i>Syrah decline in French vineyards</i></b>	
	A.S. Renault-Spilmont, S.Grenan and J.M.Boursiquot	144
<b>Poster 36</b>	<b><i>Report of new viral diseases in Chilean grapevines</i></b>	
	S. Prodan, J. Montealegre, E. Aballay, A.M. Pino, P. Fernández, R. Reyes and N. Fiore	145

<b>Poster 37</b>	<b><i>A young grafted vine decline syndrome in Argentina vineyards</i></b> G.S. Gómez Talquenca, O. Gracia, S. García Lampasona and O. Grau	<b>146</b>
------------------	--	------------

## **Workshop EPPO/NAPPO on grapevine certification**

<b>Oral</b>	<b><i>Grapevine certification and the importation of grapevines into the member countries of the North American Plant Protection Organization (NAPPO)</i></b> R. Johnson	<b>147</b>
	<b><i>EPPO certification scheme for grapevine</i></b> A.S. Roy	<b>149</b>
	<b><i>The California Grapevine Registration and Certification Program</i></b> U. Kodira	Abstract missing
	<b><i>Certified grapevines: a nurseryman's perspective</i></b> E. Kaesekamp	Abstract missing
	<b><i>Grapevine clonal and sanitary selection: the point of view of E.U. selectors</i></b> F. Mannini	<b>150</b>
	<b><i>Selection and biodiversity in viticulture: the point of view of nurserymen</i></b> S. Spada	<b>151</b>
	<b><i>Introduction of a private certification scheme into an unregulated national industry: the New Zealand experience</i></b> R. Bonfiglioli, N. Hoskins, M. Kelly, F. Edwards and G. Thorpe	<b>152</b>
	<b><i>South African Vine Improvement Association (VIA) and the South African Certification Scheme</i></b> W.T. Oosthuizen and N. van Rensburg	<b>153</b>
<b>Poster 38</b>	<b><i>Present status of grapevine sanitary selection in Argentina</i></b> O. Gracia, G.S. Gómez Talquenca, E. Vega and P.A. Worlock	<b>154</b>
<b>Poster 39</b>	<b><i>Sanitary selection and diagnostics of grapevine virus diseases in Ukraine</i></b> N. Muljukina, M. Tulaeva and V. Chisnikov	<b>155</b>
<b>Poster 40</b>	<b><i>Sanitary status of self rooted and grafted Debina and Vlachiko wine grape varieties in Epirus Greece</i></b> C.I. Dovas, C. Vovlas, G. Papazis and N.I. Katis	<b>156</b>
<b>Poster 41</b>	<b><i>Development and evaluation of a Cyprus grapevine genebank</i></b> I. Tsvetkov, N. Ioannou, A. Hadjinicoli, A. Hadjinicolis and A. Atanassov	<b>157</b>
<b>Poster 42</b>	<b><i>Sanitary improvement of grapevine in Greece: creation of a genetic bank of greek varieties in vitro</i></b> I.C. Rumbos, A.T. Sourri, A.I. Rumbou and A. Chatzaki	<b>159</b>
<b>Poster 43</b>	<b><i>Certification of grapevine planting material at Research Station for Viticulture Stefanesti, Romania</i></b> E. Buciumeanu, E. Visoiu and C.F. Popescu	<b>161</b>
<b>Poster 44</b>	<b><i>First detection of an ampelovirus, a maculavirus and two vitiviruses in Iranian table grapes</i></b> N. Habili, A. Afsharifar and R.H. Symons	<b>162</b>
<b>Poster 45</b>	<b><i>The production of grapevine certified planting material in the Ukraine</i></b> L. Konup, N. Limanskaja, I. Zhunko and B. Milkus	<b>164</b>
<b>Poster 46</b>	<b><i>Latent infections by different viruses recently detected in grapevine during sanitary selection in Lombardia (northern Italy)</i></b> A. Zorloni, S. Cinquanta, G. Scattini and G. Belli	<b>165</b>

<b>Poster 47</b>	<b><i>Survey of filamentous viruses in Portuguese vineyards</i></b> C. Santos, M.T. Santos, A.N. Pereira, I.Cortêz, O.A. Sequeira and G. Nolasco	<b>167</b>
<b>Poster 48</b>	<b><i>Sanitary status of wine grape varieties (Vitis vinifera L.) in northern Greece originating from clonal selection and collection for preservation</i></b> C.I. Dovas, H. Spinthiropoulou, M.N. Stavrakakis and N.I. Katis	<b>169</b>
<b>Poster 49</b>	<b><i>Virus testing and the Canadian Plant Protection Export Certification Program for grapevine nursery stock (PPECP)</i></b> R. C. Johnson	<b>171</b>
<b>Poster 50</b>	<b><i>Grapevine insidious viruses in Spanish viticulture</i></b> V. Padilla, I. Hita, B. García, F. Benayas and L. Velasco	<b>173</b>
<b>Poster 51</b>	<b><i>Sanitary status of 7 varieties of wine grapevine in some regions of central Italy</i></b> A. Materazzi and E. Triolo	<b>174</b>
<b>Poster 52</b>	<b><i>Clonal and sanitary selection of the grapevine in the Marche, central-eastern Italy</i></b> G. Romanazzi, S. Murolo, P. La Notte, S. Virgili, M.B. Branzanti, O. Silvestroni and V. Savino	<b>176</b>
<b>Poster 53</b>	<b><i>A preliminary survey for grapevine viruses in Egypt</i></b> H.M.H. Ahmed, M. Digiario and G.P. Martelli	<b>178</b>
<b>Poster 54</b>	<b><i>Contribution to the study of grapevine virus diseases in Serbia</i></b> S. Kuzmanovic, C.I. Dovas, N.I. Katis, M. Starovic, M. Tošić and S. Rajkovic	<b>180</b>
<b>Poster 55</b>	<b><i>Occurrence of grapevine viruses in the Czech Republic</i></b> P. Kominek, V. Holleínová, O. Jandurová and P. Pavloušek	<b>182</b>
<b>Poster 56</b>	<b><i>Problems in the production of certified grapevine planting material in Bulgaria</i></b> P. Abracheva	<b>183</b>

## **SESSION 6 – Diagnostics**

**Chair: A. Rowhani**

	<b>Plenary lecture</b>	
	<b>G. Nolasco</b>	
	<b><i>Diagnosis, recent developments and routine implementation</i></b>	<b>184</b>
<b>Oral</b>	<b><i>Use of biosensor technology (BIACORE) in the production of monoclonal antibodies to grapevine viruses</i></b> S. Seddas, G. Zeder-Lutz, B. Walter, C. Schwartz and M.H.V. Van Regenmortel	<b>188</b>
	<b><i>Isolation and characterization of monoclonal antibodies and single chain antibody fragments specific to grapevine viruses</i></b> G. Nölke, M. Orecchia, P. Cobanov, R. Fischer and S. Schillberg	<b>190</b>
	<b><i>New monoclonal antibodies developed against dsRNA for diagnostic in grapevine and fruit trees viruses</i></b> F. Cardoso, C. Baptista, E. Sousa and C. Novo	<b>191</b>
	<b><i>Application of a spot multiplex nested RT-PCR for the simultaneous detection of viruses associated to Rugose wood and Leafroll grapevine diseases</i></b> C.I. Dovas and N.I. Katis	<b>192</b>
	<b><i>Development of a detection and quantification TaqMan assay method for grapevine viruses using real time one-step RT-PCR</i></b> A. Rowhani, F. Osman and D.A. Golino	<b>194</b>
	<b><i>Multiplex RT-PCR detection of Grapevine fleck virus-like viruses in grapevine with co-amplification of control plant RNA</i></b> N. Abou Ghanem-Sabanadzovic, S. Sabanadzovic, A. Rowhani and G.P. Martelli	<b>195</b>

Poster 57	<b><i>Looking for conserved regions for primer design in Grapevine leafroll-associated virus 3 and Grapevine virus A</i></b> I. Cortez, E. Marinho, C. Santos, M.T. Santos, O. Sequeira, G. Nolasco and A.N. Pereira	196
Poster 58	<b><i>Detection of grapevine viruses by RT-PCR from dsRNA templates in three natural occurring Portuguese populations of Vitis vinifera ssp sylvestris (Gmel) Hegi</i></b> M.T. Santos, J. Cunha, J.E.J. Eiras-Dias, C. Santos and G. Nolasco	197
Poster 59	<b><i>RT-PCR diagnosis and diversity of grapevine viruses in Japan</i></b> R. Nakaune and M. Nakano	199
Poster 60	<b><i>Toward a multiplex and generic detection of phloem-limited grapevine viruses: application of oligonucleotide array and PCR-hybridization</i></b> A. Minafra, N. Boonham, P. Saldarelli, P. La Notte and I. Barker	201
Poster 61	<b><i>Production and characterization of monoclonal antibodies specific for Grapevine leafroll-associated virus 3 and epitope mapping of the coat protein</i></b> Z. Zhou, C. Turturo, O. Potere, P. Saldarelli, D. Boscia and G.P. Martelli	203
Poster 62	<b><i>Sampling methodology for detection of Grapevine fanleaf virus by ELISA</i></b> H. Bouyahia, O. Potere and D. Boscia	204

## **SESSION 7 – Epidemiology**

**Chair: M. Conti and F. Lamberti**

	<b>Plenary lecture</b>	
	<b>M. Conti</b>	
	<b><i>Grapevine virus vectors and epidemiology</i></b>	206
Oral	<b><i>Survival of Xiphinema index and retention of Grapevine fanleaf virus in a nematode population from a naturally GFLV-infected vineyard</i></b> G. Demangeat, R. Voisin, J.C. Minot, N. Bosselut, M. Fuchs and D. Esmenjaud	208
	<b><i>The coat protein of Grapevine fanleaf virus is the sole viral determinant for the exclusive transmission by its nematode vector Xiphinema index</i></b> P. Andret, C. Schmitt, G. Demangeat, V. Komar, E. Vigne, M. Bergdoll and M. Fuchs	209
	<b><i>Non-Vitis hosts of Grapevine fanleaf virus and their possible epidemiological significance</i></b> K. Izadpanah, M. Zaki-Aghl and A. Rowhani	210
	<b><i>Experimental transmission of Grapevine leafroll-associated virus 5 and 9 by longtailed mealybugs</i></b> S.T. Sim, A. Rowhani, R. Alkowni and D.A. Golino	211
	<b><i>Evidence for the apparent spread of Grapevine virus A and Grapevine leafroll-associated virus 9 in a research vineyard in Australia</i></b> N. Habili, J.W. Randles and A. Rowhani	213
	<b><i>Transmission of an Italian isolate of Grapevine leafroll-associated virus 3 by the mealybug Heliococcus bohemicus</i></b> A. Zorloni, S. Cinquanta, S. Prati and P.A. Bianco	215
	<b><i>Monitoring the field spread of Grapevine leafroll-associated virus 3 for twelve years</i></b> Cabaleiro, C. and A. Segura	216
Poster 63	<b><i>Mealybug transmission of grapevine viruses in Japan</i></b> M. Nakano, R. Nakaune and S. Komazaki	218
Poster 64	<b><i>Shiraz disease (SD) is transmitted by mealybug Planococcus ficus and associated with Grapevine virus A</i></b> D.E. Goszczynski and A.E.C. Jooste	219

- Poster 65 *Molecular characterization of Xiphinema index populations by PCR-RFLP and sequence analyses of the ITS region*  
F. De Luca, A. Agostinelli, S. Fatemy and F. Lamberti 220

## SESSION 8 - Transgenic resistance

Chair: M. Laimer

- Plenary lecture**  
**M. Fuchs**  
*Transgenic resistance: state of the art and perspectives* 221
- Oral *Engineering durable resistance in grapevines: a novel strategy for integrated disease management to overcome environmental impact of pesticides*  
R. Fischer and S. Schillberg 224
- Virus resistance breeding in grapevine*  
M. Laimer 225
- The construction of gene silencing vectors for the introduction of multiple virus resistance in grapevines*  
J.T. Burger, M. Engelbrecht and C. Van Eeden 226
- Induction of silencing in transgenic tobacco (Nicotiana benthamiana) and grapevine (Vitis spp) plants*  
G.M. Reustle, R. Jardak-Jamoussi, R. Ebel, C. Burkhart, M. Becker, R. Wolf, T. Manthey, A. Bassler, T. Wetzal, A. Ghorbel and G. Krczal 228
- RNA interference as a novel strategy for resistance against Grapevine fanleaf virus*  
C. Bruno, P. Arce and P.D. Valenzuela 229
- Poster 66 *Regeneration of Tunisian transgenic grapevine plants and evaluation of the gene construct for Grapevine fanleaf virus resistance*  
R. Jardak-Jamoussi, B. Bouamama, G. Krczal, A. Mliki, T. Wetzal, G.M. Reustle and A. Ghorbel 230
- Poster 67 *Evaluation of transgenic grapes tolerance toward Grapevine fanleaf virus*  
I. Tsvetkov, B. Choleva, M. Yankulova, N. Minchev, V. Colova and A. Atanassov 231
- Poster 68 *Antibody-based resistance in grapevine: generation, characterisation and expression of single chain antibody fragments specific to Grapevine leafroll-associated virus 3*  
G. Nölke, M. Orecchia, P. Saldarelli, M. Dell'Orco, A. Minafra, G.P. Martelli, R. Fischer and S. Schillberg 232<sup>bis</sup>
- Poster 69 *Induction of gene silencing to Grapevine virus A and Grapevine virus B through marker free transformation of Nicotiana and Vitis spp*  
C. Turturo, P. Saldarelli, G. Bottalico, M. Dell'Orco, A. Minafra, I. Gribaudo, V. Savino and G.P. Martelli 233

## SESSION 9 - Virus elimination and crop performance

Chair: A. Quacquarelli

- Plenary lecture**  
**F. Mannini**  
*Virus elimination in grapevine and crop performance* 234
- Oral *Elimination of Grapevine leafroll-associated virus 3 from the wine grapevine Müller-Thurgau (Vitis vinifera.) through somatic embryogenesis*  
I. Gribaudo, J. Bondaz, D. Cuzzo and G. Gambino 240
- Elimination of Grapevine Virus A by cryopreservation*  
Q. Wang, R. Gafny, P. Li, M. Mawassi, I. Sela and E. Tanne 242

	<i>Somatic embryogenesis, a reliable method for Grapevine fleck virus free grapevine regeneration</i>	243
	C.F. Popescu, E.C. Buciumeanu and E. Visoiu	
Poster 70	<i>Effect of antiviral drugs in Vitis vinifera infected explants</i>	244
	A. Panattoni and E. Triolo	
Poster 71	<i>Virus-free grapevines may contribute to safeguard and exploit the viticulture in the difficult environment of the 5 Terre (north-west Italy)</i>	245
	F. Mannini, I. Gribaudo, D. Cuozzo, S. Tronfi and F. Bonanini	
Poster 72	<i>The role of rootstock genotype in the effects of single and mixed infections of grapevine viruses</i>	246
	D.A. Golino, S. Sim and A. Rowhani	
Poster 73	<i>Flurprimidol and D-mannitol as tools for in vitro storage of grapevine germplasm</i>	248
	I. Tsvetkov, N. Ioannou, A. Hadjinicoli, A. Hadjinicolis and A. Atanassov	
Poster 74	<i>Effect of grape viruses (fanleaf, yellow mosaic, leafroll) on quantity and quality of yield and on the status of grapevine plantation</i>	250
	A. Simon, L. Bodor and G. Bujtás	
Poster 75	<i>Changes in agronomical and oenological performances of clones of the grapevine cv Gewürztraminer after Grapevine fanleaf virus elimination by heat therapy</i>	252
	U. Malossini, A.M. Ciccotti, P. Bragagna, M.E. Vindimian, S. Moser, G. Versini and G. Nicolini	
Poster 76	<i>Grapevine viruses (GLRaV-1+GVA) inhibits pigments, RuBPC and photosynthetic activities in field grown grapevine (Vitis vinifera l.cv. marzemino) leaves</i>	254
	U. Malossini, I. Roncador, A.M. Ciccotti, M. Bertamini and N. Nedunchezian	
Poster 77	<i>Sanitation of wine grape selection from central and southern Italy</i>	256
	G. Bottalico, A. Campanale, P. La Notte, C. Pirolo and V. Savino	
	<b>AUTHOR INDEX</b>	257
	<b>ADDENDUM</b>	
Poster 78	<i>Incidence of nine viruses in clonal selections of Italian V. vinifera cultivars</i>	261
	R. Credi, L. Valenti, A.R. Babini, F. Bellini and M. Cardoni
