 <b>Session I - Introductory keynotes</b>	
Oral	
Martelli G. P. Grapevine Virology Highlights 2006-09	15
Gugerli P. 25 years of serological identification of grapevine leafroll-associated viruses: antiserum and monoclonal antibodies to GLRaV-1 to GLRaV- 9	24
Dolja V. V. New developments in understanding gene functions and evolution of the grapevine Closteroviruses	29
 <b>Session II – Detection – Plant material and Virus source</b>	
Oral	
<i>Invited lecture</i> Sabanadzovic S. Viruses of native <i>Vitis</i> germplasm in the Southeastern united states	32
Comparison of High Throughput Low Density Arrays, Rt-PCR and Real-Time Taqman® RT-PCR in the detection of grapevine viruses Osman F., C. Leutenegger, D.A. Golino, A. Rowhani	36
Grapevine viruses in Chile: Multi-parallel detection based on metagenomic strategies Engel E. A., P. F. Escobar, P. Rivera, P. D.T. Valenzuela.	38
Grapevine virus collection at Nyon: A contribution to a putative network of a worldwide grapevine virus reference collection Gugerli P., J-J. Brugger, M-E. Ramel, S. Besse.	40
Poster 01	
Grapevine virus Q: The first plant virus with a permuted active site of RNA-dependent RNA polymerase Sabanadzovic S., N. Abou Ghanem-Sabanadzovic, A. E. Gorbalenya	42
Poster 02	
Production of monoclonal antibodies to <i>Grapevine leafroll- associated virus 9 (GLRaV-9)</i> Gugerli P., S. Rigotti, M-E. Ramel, N. Habili, A. Rowhani, W. Bitterlin, S. Besse.	44
Poster 03	
Detection of viruses in seeds of infected grapevines with an emphasis on <i>Grapevine rupestris stem pitting-associated virus</i> Habili N., R. Davies, J. Randles.	46
Poster 04	
Real time PCR for sensitive reliable grapevine virus detection Malan S., M-J. Freeborough, J. Burger	48
Poster 05	
Prevalence of seven grapevine viruses in table grapes from Vinalopó (Alicante) determined by ELISA and Real-Time RT-PCR Bertolini E., C. Martínez, J. García, J. Juárez, A. Martínez, E. Vidal, A. Yuste, M. Albiach-Martí, M. Cambra, A. Olmos.	50
Poster 06	
Virus-derived sequences in the nuclear genome of grapevine Bertsch C., M. Beuve, V. V. Dolja, M. Wirth, F. Pelsy, E. Herrbach, O. Lemaire	52
Poster 07	
How widespread is the presence of <i>Grapevine leafroll-associated virus 8 (GLRaV-8)</i> putative capsid protein gene sequences in DNA and RNA obtained from grapevine varieties? Esteves F., M. Teixeira Santos, M. De Lurdes Rocha, J. E. Eiras-Dias, F. Fonseca	54
Poster 08	
The occurrence of viruses in the clonal selection vineyards in Czech republic Holleinová V., L. Bláhová, K. Baránková	56
Poster 09	
Contribution of new certified clones to the improvement of the italian table grape industry La Notte P., C. Pirolo, P. Giannini, G. Bottalico, A. Campanale, V. Savino, G. P. Martelli	58
Poster 10	
Clonal selection and sanitary status of local grapevine germplasm in Serbia Mandić B., Ž. Ivanović, L. Susca, G. Bottalico, M. Starović, D. Jakšić, S. Kuzmanović, D. Ivanišević, V. Gavrilović, Korać N., Digiario M., P. La Notte	60

Poster 11	<b>Old grapevine varieties vineyards: a window over a pre sanitary selection era and a source of viruses</b> Teixeira Santos M, M. De Lurdes Rocha, A. Guedes Da Silva, F. Esteves, F. Fonseca, J. E. Eiras-Dias	62
<b>Session III - Fanleaf and other spherical viruses</b>		
Oral	<i>Invited lecture</i> <b>Demangeat G.</b> <b>Nepovirus transmission by Longidoridae nematodes with special emphasis on the pair <i>Grapevine fanleaf virus/Xiphinema index</i></b>	64
	<b>Identification of plasmodesmata located receptors involved in the movement of <i>Grapevine fanleaf virus</i> (GFLV) and other viruses employing tubule-guided movement</b> Amari K., E. Boutant, C. Hofmann, L. Fernandes-Calvino, C. Schmitt-Keichinger, P. Didier, C. Thomas, A. Lerich, M. Heinlein, Y. Mély, A. Maule, C. Ritzenthaler	69
	<b>Symptom determinants on the <i>Arabis mosaic nepovirus</i> genome</b> Dupuis L., C. Himber, P. Dunoyer, A. Bassler, M. Keller, T. Wetzel	71
	<b>Recombination events in Rna-2 of <i>Grapevine fanleaf virus</i> and <i>Arabis mosaic virus</i> in grapevines affected by Yellow mosaic</b> Jawhar J., A. Minafra, P. La Notte, C. Pirolo, P. Saldarelli, D. Boscia, V. Savino, G. P. Martelli	73
	<b>The specificity of GFLV and ARMV transmission by their respective nematodes: from structure to function</b> Schellenberger P., G. Demangeat, P. Andret-Link, C. Keichinger, M. Bergdoll, P. Bron, S. Trapani, B. Lorber, C. Sauter, A. Marmonier, D. Esmenjaud, O. Lemaire, M. Fuchs, C. Ritzenthaler	75
	<b>Partial RNA-2 Sequence of <i>Grapevine Bulgarian latent virus</i></b> Elbeaino T., F. Fallanaj, M. Digiaro, S. Kuzmanović	77
	<b>Characterization of <i>Raspberry bushy dwarf virus</i> isolates from grapevine</b> Mavrič Pleško I., M. Viršček-Marn, S. Širca, G. Urek	79
	<b>Isolation of movement protein gene by the use of degenerate primers from Iran isolates of <i>Grapevine fanleaf virus</i> and assessment of the genetic diversity</b> Sokhandan Bashir N., A. Delpasand Khabbazi	81
Poster 12	<b>Real-time PCR of <i>Grapevine fanleaf virus</i></b> Bláhová L., M. Pidra	83
Poster 13	<b>First records of <i>Arabis mosaic virus</i> (ARMV) on grapevine in Spain</b> Abelleira A., J. P. Mansilla, V. Padilla, I. Hita, C. Cabaleiro, A. Olmos, F. J. Legorburu	85
Poster 14	<b>Absolute quantification of <i>Grapevine fanleaf virus</i> in <i>Chenopodium quinoa</i> using real-time RT-PCR assays</b> Ulloa S., C. Ritzenthaler, P.D.T. Valenzuela, C. Bruno	86
Poster 15	<b>Detection of Virus like particles (Vlps) by ISEM in transgenic grapevines expressing different GFLV CP-constructs</b> Gottschamel J., M. Castellano, F. Maghuly, M. Laimer	88
Poster 16	<b>Distribution of <i>Grapevine fanleaf virus</i> (GFLV) in grapevines during the season</b> Čepin U., S. Krsmanović, M. Pompe-Novak, M. Ravnikar	90
Poster 17	<b>Comparisons of genomic and pathological features among barley and grapevine infecting-isolates of <i>Arabis mosaic virus</i></b> Marmonier A., E. Vigne, V. Komar, G. Demangeat, S. Besse, P. Gugerli, O. Lemaire	92
Poster 18	<b><i>Nicotiana benthamiana</i> plants expressing viral small interfering RNA show differential resistance level against GFLV</b> Bruno C., P.D.T. Valenzuela	94
Poster 19	<b>Genetic diversity of the coat protein gene of Chilean isolates of <i>Grapevine fanleaf virus</i></b> Zamorano A., A.M. Pino, N Fiore	96
Poster 20	<b>Genetic variability within the coat protein gene of <i>Grapevine fanleaf virus</i> (GFLV) isolates from South Africa</b> Liebenberg A., M-J. Freeborough, C. J Visser, D.U. Bellstedt, J.T. Burger	98
Poster 21	<b>Mycorrhiza reduce development of the nematode vector of <i>Grapevine fanleaf virus</i> in soil and root systems</b> Hao Z., L. Fayolle, D. Van Tuinen, X. Li, V. Gianinazzi-Pearson, S. Gianinazzi	100
Poster 22	<b>Evidence of recombination in 2A gene from a <i>Grapevine fanleaf virus</i> isolate</b> Nourinejhad Zarghani S., M. Shams-Bakhsh, M. Pazhohande, N. Sokhandan Bashir	102

## Session IV – Epidemiology – Survey of vineyards

Oral	<b>Development and validation of sampling strategies for the detection of endemic viruses of Australian grapevines</b>	104
	Constable F., P. Nicholas, N. Nancarrow, B. Rodoni	
	<b>Preliminary results on the quantification of different grapevine viruses in a typical northwestern Italian cultivar</b>	106
	Pacifico D., P. Caciagli, F. Mannini, F. Veratti, C. Marzachi	
	<b>Current status of grapevine viruses in the Pacific Northwest vineyards of the United States</b>	108
	Rayapati N.A., M.A. Tefera, A.J. Olufemi, J. Sridhar, K. Gandhi, L.R. Gutha, R.R. Martin	
	<b>Survey of wild grapes, weed and cover crop species for grapevine viruses</b>	110
	Golino D.A., S.T. Sim, F. Osman, R. Aldamrat, V. Klaassen, A. Rowhani	
	<b>Contrasting epidemiologies of grapevine viruses depending on appellation and variety.</b>	112
	Legorburu F.J., E. Recio, E. López, M. Larreina, F. Aguirrezábal, J.F. Cibrián, R. González-Rodríguez, C. Cabaleiro	
Poster 23	<b>A preliminary survey of grapevine viruses in Kurdistan province (West of Iran)</b>	114
	Afsharifar A.R., M. Kamali, B. Harighi, S. Bahrami Kamangar, V. Roumi, K. Izadpanah	
Poster 24	<b>Occurrence of grapevine leafroll-associated virus-1 and 3 in Croatian autochthon grapevine varieties from Dalmatia</b>	116
	Voncina D., E. Dermic, B. Cvjetkovic, E. Maletic, I. Pejic, J. Karoglan Kotic	
Poster 25	<b>Survey of major grapevine virus diseases in the vineyard of Valais (Switzerland)</b>	118
	Besse S., P. Gugerli	
Poster 26	<b>A survey of grapevine viruses in native cultivars in old plantations of Ștefănești – Argeș vineyard, România</b>	120
	Buciumeanu E.-C., I.C. Guță, F. Semenescu	
Poster 27	<b>A survey for endemic and exotic viruses of Australian grapevines</b>	122
	Constable F., P. Nicholas, N. Nancarrow, B. Rodoni	
Poster 28	<b>Frequency of occurrence of grapevine virus disease-complexes based on over 30 years indexing-results in Hungary</b>	124
	Lázár J., M. Terjék	
Poster 29	<b>Emerging diseases of the grapevine at the Ukraine</b>	126
	Milkus B.N., I.D. Zhun'ko, N.V. Limanska, L.A. Konup	
Poster 30	<b>Sanitary status of autochthonous minor wine grape varieties: an unusual diffusion of <i>Arabis mosaic virus</i></b>	127
	Materazzi A., C. D'Onofrio, H. Bouyahia, E. Triolo	
Poster 31	<b>The virus status of grapevine mother plantations in Cyprus</b>	129
	Neophytou G., K. Sykas, N. Ioannou	
Poster 32	<b>Presence of GLRaV -1, -2, -3, -4 and -6 in Spanish vine material according to different ecosystems.</b>	131
	Padilla V., I. Hita, B. García de Rosa, C.V. Padilla, E. Salmerón, N. López, S. Lucas	

## Session V - Phytoplasma diseases

	<b>Invited lecture</b>	132
	<b>Malembic-Maher S., P. Salar, P. Carle, X. Foissac</b>	
	<b>Ecology and taxonomy of Flavescence dorée phytoplasmas: the contribution of genetic diversity studies</b>	
	<b>Molecular identification and geographic distribution of Flavescence dorée phytoplasma strains</b>	135
	Bertaccini A., S. Paltrinieri, F. Dal Molin, J. Mitrović, B. Duduk	
	<b>Comparison of prevalence, geographical distribution and biological properties of two Flavescence dorée phytoplasma strains</b>	137
	Salar P., D. Clair, X. Foissac, E. Boudon-Padieu, S. Malembic-Maher	
	<b>Genetic polymorphism of stolbur phytoplasma in grapevine, wild plants and insects</b>	139
	Filippin L., E. Tonon, V. Forte, M. Zottini, G. Santovito, M. Borgo, E. Angelini	
	<b>Aspects of the interaction of Stolbur phytoplasma, vectors and host plants in the two epidemic systems of Bois noir</b>	141
	Maixner M., J. Johannesen, A. Seitz	
	<b>On host races and co-evolution of the grapevine yellows vector <i>Hyalesthes obsoletus</i> and stolbur phytoplasma</b>	143
	Johannesen J., A. Seitz, N. El Sayar, M. Maixner	

	<b>Molecular markers among stolbur phytoplasma (16SrXII-A) strains and their association with natural ecologies of grapevine Bois noir in Italy</b>	<b>145</b>
	Quaglino F., Y. Zhao, P.A. Bianco, W. Wei, G. Romanazzi, S. Murolo, M.R. Silletti, V. Savino, P. Casati, G. Durante, R.E. Davis	
	<b>Long term effects of Stolbur phytoplasma on grapevines in Israel</b>	<b>147</b>
	Zahavi T., R. Sharon, M. Mawassi, V. Naor	
	<b>'Bois noir' phytoplasma induces significant reprogramming of genes involved in carbohydrate metabolism and photosynthesis in the field grown grapevine</b>	<b>149</b>
	Dermastia M., M. Hren, P. Nikolić, A. Rotter, N. Terrier, M. Ravnikar, K. Gruden	
	<b>Detection and identification of a new phytoplasma disease in grapevines in the Western Cape</b>	<b>151</b>
	Engelbrecht M., J. Joubert, J.T. Burger	
	<b>Biochemical pathways in phytoplasma–plant interactions in symptomatic and recovered leaves of Bois noir - affected grapevines</b>	<b>153</b>
	Landi L., G. Romanazzi	
<b>Poster 33</b>	<b>Proteomic analysis of grapevine (<i>Vitis vinifera</i> L. cv. Nebbiolo) midrib tissues infected by flavescence dorée phytoplasma</b>	<b>155</b>
	Margaria P., S. Palmano	
<b>Poster 34</b>	<b>Study of <i>rplP</i> gene for characterization and phylogenetic analysis of phytoplasma strains within the 16Sr-V group</b>	<b>157</b>
	Durante G., E. Boudon-Padieu, D. Clair, F. Quaglino, P. Casati, P.A. Bianco	
<b>Poster 35</b>	<b>Real-time PCR assay for diagnosis of Flavescence dorée (16Sr-V)</b>	<b>159</b>
	Durante G., M. Calvi, A. Colombo, P.A. Bianco, P. Casati	
<b>Poster 36</b>	<b>Detection of grapevine Flavescence dorée and Bois noir phytoplasmas by multiplex Real-time PCR (Taqman<sup>®</sup>)</b>	<b>161</b>
	Terlizzi F., C. Ratti, C. Poggi Pollini, A.. Pisi, R. Credi	
<b>Poster 37</b>	<b>Detection of phytoplasmas associated with grapevine yellows in rootstocks</b>	<b>162</b>
	Borgo M., L. Filippin, N. Bertazzon, E. Angelini	
<b>Poster 38</b>	<b>High occurrence of <i>Scaphoideus titanus</i> on wild rootstocks in North Eastern Italy</b>	<b>164</b>
	Forte V., M. Borgo, L. Dalla Cia, E. Angelini	
<b>Poster 39</b>	<b>Spatial correlation of <i>Scaphoideus titanus</i> Ball adults on European grapevine at a plot scale: a case study</b>	<b>166</b>
	Lessio F., E. Borgogno Mondino, A. Alma	
<b>Poster 40</b>	<b>Do <i>Scaphoideus titanus</i> larvae aggregate for feeding ?</b>	<b>168</b>
	Chuche J., A. Boursault, D. Thiéry	
<b>Poster 41</b>	<b>Acquisition of Flavescence dorée phytoplasma by <i>Scaphoideus titanus</i> Ball from recovered and infected grapevines of Barbera and Nebbiolo cultivars</b>	<b>170</b>
	Galetto L., C. Roggia, C. Marzachi', A. Alma, D. Bosco	
<b>Poster 42</b>	<b>Graft transmission trials of Flavescence dorée phytoplasma from recovered grapevines</b>	<b>172</b>
	Carraro L., N. Loi, P. Ermacora, M. Martini, M. Borgo, P. Casati, R. Osler	
<b>Poster 43</b>	<b>Microbial diversity in healthy, yellows infected and recovered grapevines</b>	<b>174</b>
	Bulgari D., P. Casati, L. Brusetti, F. Quaglino, D. Daffonchio, P.A. Bianco	
<b>Poster 44</b>	<b>Flavescence dorée in the Empordà (Catalonia): results of <i>Scaphoideus titanus</i> containment through aerial treatments</b>	<b>176</b>
	Torres E., J. Rahola, J. Bech, S. Paltrinieri, A. Bertaccini	
<b>Poster 45</b>	<b>Epidemics of Flavescence dorée disease in Portugal</b>	<b>178</b>
	Sousa E., C. Sá, F. Cardoso, M. Mesquita, A. Oliveira, P. Casati, P.A. Bianco	
<b>Poster 46</b>	<b>Grapevine cultivar Plovdina – is it really an indicator plant for flavescence dorée disease ?</b>	<b>180</b>
	Kuzmanović S., D. Jošić, Ž. Ivanović, M. Starović, S. Stojanović, G. Aleksić, M. Tošić	
<b>Poster 47</b>	<b>Phytoplasma diffusion through grapevine propagation material and hot water treatment</b>	<b>182</b>
	Mannini F., N. Argamante, G. Gambino, A. Mollo	
<b>Poster 48</b>	<b>Towards strain differentiation among grapevine bois noir phytoplasmas</b>	<b>184</b>
	Contaldo N., B. Duduk, S. Paltrinieri, M. Kölber, I. Ember, A. Bertaccini	
<b>Poster 49</b>	<b>Genetic diversity among Bois noir phytoplasma populations in Italy: new 16Sr subgroups and distinct SNP genetic lineages</b>	<b>186</b>
	Quaglino F., Y. Zhao, P.A. Bianco, W. Wei, G. Romanazzi, S. Murolo, P. Casati, G. Durante, R.E. Davis	
<b>Poster 50</b>	<b>Preliminary results on the variability of Bois noir isolates in a vineyard system in Sicily</b>	<b>188</b>
	Tessitori M., C. Oliveri, F. Veratti, V. Cavalieri, R. La Rosa, C. Marzachi'	

Poster 51	<b>Incidence of Bois noir phytoplasma in different viticulture regions of Spain and stolbur isolates distribution in plants and vectors</b> Batlle A., J. Sabaté, A. Laviña	190
Poster 52	<b>Photosynthesis and transpiration in grapevines affected by Bois noir and recovered</b> Murolo S., G. Romanazzi, D. Neri	193
Poster 53	<b>Abiotic stress and treatment with elicitors for the control of Bois noir in Chardonnay vineyards</b> Romanazzi G., S. Murolo, A. Masciulli, D. D'Ascenzo, V.A. Prota, R. Garau	195
Poster 54	<b>Reaction of different grapevine varieties to summer pruning measures for combating Bois noir</b> Ipach U., E. Müller, L. Kling, B. Helmstätter	198
Poster 55	<b>Can pruning measures combat bois noir disease of grapevine ?</b> Riedle-Bauer M., K. Hanak, F. Regner, W. Tiefenbrunner	200
Poster 56	<b><i>Anaceratagallia ribauti</i> (Oss., 1938) (Hemiptera, Auchenorrhyncha, Agalliinae) transmits a stolbur type phytoplasma</b> Riedle-Bauer M., A. Sára	201
Poster 57	<b>Vector-phytoplasma relationships during natural infection of <i>Hyalesthes obsoletus</i>, <i>Euscelis lineolatus</i>, <i>Neoliticus fenestratus</i> and <i>Psammotettix alienus</i> captured in vineyard agro-ecosystems in the Marche region (Central-Eastern Italy)</b> Landi L., N. Isidoro, P. Riolo	202
Poster 58	<b>Further data on occurrence of grapevine yellows-associated phytoplasmas in vineyards of Veneto region (north-eastern Italy)</b> Quaglino F., N. Mori, P. Casati, A. Zorloni, G. Zanini, P.A. Bianco	204
Poster 59	<b>Survey of phytoplasma diversity in heavily grapevine yellows affected areas of Croatia</b> Šeruga Musić M., D. Škorić, Ž. Budinščak, I. Križanac, I. Mikec	206
Poster 60	<b>Identification of stolbur-related phytoplasmas in grapevine showing decline symptoms in Iran</b> Karimi M., N. Contaldo, B. Mahmoudi, B. Duduk, A. Bertaccini	208
Poster 61	<b>New high incidence of Australian grapevine yellows and evidence on pathogenesis following natural heat therapy in severely infected South Australian vineyards</b> Magarey P.A., N. Habili, J. Altmann, J.D. Prosser	210

## Session VI – Molecular biology – New technologies

Oral	<b><i>Invited lecture</i></b> <b>Peretz Y., R. Mozes-Koch, E. Tanne, <u>I. Sela</u></b> <b>A universal vector for expression and silencing in plants (including grapevine)</b>	212
	<b>Expression/silencing of GVA components in grapevine and <i>N. benthamiana</i> using the IL-60 system</b> Peretz Y., I. Sela, E. Tanne	214
	<b>Virome of a vineyard: Ultra deep sequence analysis of diseased grapevines</b> Coetzee B., M-J. Freeborough, H.J Maree, J-M. Celton, D.J.G. Rees, J.T. Burger	216
	<b>Deep sequencing analysis of viral short RNAs from Pinot noir clone ENTAV 115</b> Pantaleo V., P. Saldarelli, L. Miozzi, A. Giampetruzzi, A. Gisel, S. Moxon, T. Dalmay, J. Burgyan	218
	<b>High-Throughput sequencing analysis of RNAs from a grapevine showing Syrah decline symptoms reveals a multiple virus infection that includes a novel virus</b> Al Rwahnih M., S. Daubert, D.A. Golino, A. Rowhani	220
	<b>Characterisation of the genomic and subgenomic RNA of <i>Grapevine leafroll-associated virus 3</i> (GLRaV-3)</b> Maree H.J., E. Jooste, D. Stephan, M-J. Freeborough, J.T. Burger	222
	<b><i>Grapevine fanleaf virus</i> replication: illuminating the way</b> Schmitt-Keichinger C., M-C. Herranz-Gordo, F. Courte, R. Elamawi, S. Chapuis, P. Didier, Y. Mély, C. Ritzenthaler	224
Poster 62	<b>Vacuum-agroinfiltration of different <i>V. vinifera</i> cultivars and application of VIGs in the cv. Sultana</b> Stephan D., J. Du Preez, C. Stander, M. Vivier, M. Muruganatham, M. Mawassi, J.T. Burger	226

## Session VII - Virus effects – Control – Crop performances

Oral	<b>Transgenic rootstocks expressing GFLV coat protein gene in a three years field trial; resistance assessment, impact on GFLV diversity and exchanges between rootstock and scion</b> Hemmer C., E. Vigne, V. Goldschmidt, V. Komar, A. Marmonier, L. Valat, G. Demangeat, S. Vigneron, J.E. Masson, O. Lemaire	228
------	---	-----

	<b>A case study of control of grapevine leafroll disease spread on Vergelegen wine estate, South africa, 2002-2008</b>	<b>230</b>
	Pietersen G., N. Spreeth, T. Oosthuizen, A. Van Rensburg, D. Lottering, D. Tooth, N. Rossouw	
	<b>Tentative analysis of the economic impact of grapevine leafroll disease in the vineyard of Valais (Switzerland)</b>	<b>232</b>
	Besse S., C. Rütsche, P. Gugerli	
	<b>Field performances and wine quality modification in a clone of Dolcetto (<i>Vitis vinifera</i> L.) after GLRaV-3 elimination</b>	<b>234</b>
	Mannini F., A. Mollo, D. Cuozzo, R. Credi	
	<b>A mild strain of <i>Grapevine leafroll-associated virus 3</i> is present in desirable clones of Crimson seedless table grapes in western australia</b>	<b>237</b>
	Habili N., I. Cameron, J. Randles	
<b>Poster 63</b>	<b>Detection and elimination of <i>grapevine fanleaf virus</i> in callus, somatic embryos and regenerated plantlets of grapevine</b>	<b>239</b>
	Gambino G., R. Vallania, I. Gribaudo	
<b>Poster 64</b>	<b>Virus elimination in infected clones of four Greek grapevine wine cultivars (Roditis, Xinomavro, Baftra and savatIano) using <i>in vitro</i> thermotherapy and tip meristem culture</b>	<b>241</b>
	Grammatikaki G., A. Avgelis	
<b>Poster 65</b>	<b>Virus effects on vine growth and fruit components of three California ‘heritage’ clones of Cabernet Sauvignon</b>	<b>243</b>
	Golino D.A., J. Wolpert, S.T. Sim, J. Benz, M. Anderson, A. Rowhani	
<b>Poster 66</b>	<b>Virus effects on vine growth and fruit components of Cabernet Sauvignon on six rootstocks</b>	<b>245</b>
	Golino D.A., J. Wolpert, S.T. Sim, J. Benz, M. Anderson, A. Rowhani	
<b>Poster 67</b>	<b>Comparative study of <i>in vitro</i> behaviour of grapevine (<i>V. vinifera</i> L, Fetească neagră cv.) under the influence of various virus infections</b>	<b>247</b>
	Guță I.C., E-C. Buciumeanu, E. Vișoiu	
<b>Poster 68</b>	<b>A study on LN33 grapevine infected with five viruses</b>	<b>249</b>
	Komínek P., M. Komínková	
<b>Poster 69</b>	<b>Effect of <i>Grapevine fanleaf virus</i> (GFLV) and <i>Grapevine leafroll-associated virus 3</i> (GLRaV-3) on red wine quality</b>	<b>251</b>
	Legorburu F.J., E. Recio, E. López, J. Baigorri, M. Larreina, A. Remesal, J.F. Cibriáin, L. Caminero, J. Suberviola, F. Aguirrezábal	
<b>Poster 70</b>	<b>Leafroll symptoms caused by GLRaV-3 are associated with an increase of resveratrol in grapevine leaves</b>	<b>252</b>
	Bertazon N., O. Repetto, M. De Rosso, R. Flamini, E. Angelini, M. Borgo	
<b>Poster 71</b>	<b>Effects of gva elimination on physiological, agronomic and oenological characteristics of a <i>V. vinifera</i> Marzemino clone</b>	<b>254</b>
	Malossini U., L. Zulini, A. Vecchione, E. Decarli, P. Bianchedi, R. Moscon, G. Nicolini	
<b>Poster 72</b>	<b>Effects of GLRaV - 1 elimination on physiological, agronomic and oenological characteristics of two cv. Marzemino clones</b>	<b>256</b>
	Malossini U., L. Zulini, G. Nicolini, A. Vecchione, E. Decarli, P. Bianchedi, R. Moscon	
<b>Poster 73</b>	<b>Control of grape berry mechanical properties modifications due to GFLV by mean of texture analysis</b>	<b>258</b>
	Santini D., L. Rolle, F. Mannini	
<b>Poster 74</b>	<b>2-amino-6-mercaptopurine: a preliminary study of a novel chemical group for grapevine antiviral therapy</b>	<b>260</b>
	Luvisi A., A. Panattoni, E. Triolo	
<b>Poster 75</b>	<b>Advances on the eradication of <i>Grapevine rupestris stem pitting associated virus</i> (GRSPaV) from <i>Vitis vinifera</i> explants</b>	<b>262</b>
	Skiada F., V.I. Maliogka, E.P. Eleftheriou, N.I. Katis	

## Session VIII Viruses of the leafroll complex

<b>Oral</b>	<b><i>Invited lecture</i></b>	<b>264</b>
	<b>Cabaleiro C.</b>	
	<b>Current advances in the epidemiology of Grapevine leafroll disease</b>	
	<b>First epidemiological study of ampeloviruses in Turkish vineyards</b>	<b>269</b>
	Buzkan N., S. Karadag, V. Oztekin, A. Kaya, A. Minafra, Y. Ben-Dov	
	<b>Distribution and diversity of Leafroll-associated ampeloviruses in viruliferous vectors and grapevine hosts</b>	<b>271</b>
	Fuchs M., P. Marsella-Herrick, G.M. Loeb, T.E. Martinson, H.C. Hoch	

	<b>Identification and distribution of three divergent molecular variants of <i>Grapevine leafroll-associated virus - 3 (GLRaV-3)</i> in South african vineyards</b>	<b>273</b>
	Jooste E., H.J. Maree, G. Pietersen, D.E. Goszczynski, J.T. Burger	
	<b>Taxonomy, complete nucleotide sequence and genome organization of <i>grapevine leafroll-associated virus - 7</i></b>	<b>275</b>
	Mikona C., C. Turturo, B. Navarro, W. Menzel, A. Minafra, M.E. Rott, G.P. Martelli, W. Jelkmann	
	<b>Comparison of phylogenetic inference based on HSP70, HSP90 and CP genes of GLRaV-3: implications for detection and taxonomy</b>	<b>276</b>
	Teixeira Santos M., F. Esteves, M. De Lurdes Rocha, J.E. Eiras-Dias, F. Fonseca	
	<b>The role of seasonality on mealybug transmission of <i>Grapevine leafroll-associated viruses</i>: an ecological hypothesis</b>	<b>278</b>
	Almeida R.P.P., C-W. Tsai, K.M. Daane	
	<b>Spread of GVA, GLRaV-1 and -3 and role of the mealybug vector <i>Heliococcus bohemicus</i> in a vineyard of Langhe (Northwestern Italy)</b>	<b>279</b>
	Bertin S., F. Mannini, D. Bosco, G. Gambino, D. Cuzzo, I. Gribaudo	
	<b>Transmission of <i>Grapevine leafroll-associated virus 3 (GLRaV-3)</i> by three soft scale insect species (Hemiptera: Coccidae) and notes on their developmental biology on grapevine</b>	<b>281</b>
	Krüger K., N. Douglas	
	<b>Monitoring of <i>Grapevine leafroll-associated virus 1 (GLRaV-1)</i> dispersion by the mealybug <i>Phenacoccus aceris</i></b>	<b>283</b>
	Le Maguet J., E. Herrbach, G. Hommay, M. Beuve, E. Boudon-Padieu, O. Lemaire	
	<b>Transmission trials of grapevine viruses by the mealybug <i>Planococcus ficus</i> (Hemiptera: Pseudococcidae)</b>	<b>285</b>
	Credi R., F. Terlizzi, L. Martini, S. Borsari	
	<b>Transmission of <i>Grapevine leaf roll-associated virus-1</i> and -3 (Ampelovirus) and <i>Grapevine virus A (Vitivirus)</i> by natural populations of soft scales and mealybugs in the North-Eastern French vineyard</b>	<b>286</b>
	Hommay G., J. Le Maguet, V. Komar, O. Lemaire, E. Herrbach	
	<b>Rapid spread of leafroll disease in Cabernet Sauvignon grapevines in Napa Valley, California</b>	<b>288</b>
	Golino D.A., E. Weber, S.T. Sim, A. Rowhani	
	<b>Sequence variation in <i>Grapevine leafroll-associated virus-3 (GLRaV-3)</i> New Zealand isolates</b>	<b>290</b>
	Chooi K.M., M.N. Pearson, D. Cohen, J.C.H. Pong	
Poster 76	<b>A real-time RT-PCR assay for the detection and quantification of <i>Grapevine leafroll-associated virus 3 (GLRaV-3)</i> in <i>Vitis vinifera</i> l. (Vitaceae) and <i>Planococcus ficus</i> (Signoret) (Hemiptera: Pseudococcidae)</b>	<b>292</b>
	Douglas N., G. Pietersen, K. Krüger	
Poster 77	<b>Advances in molecular detection of GLRaV-1</b>	<b>294</b>
	Bertazzon N., I. Bazzo, O. Repetto, M. Borgo, E. Angelini	
Poster 78	<b>Development of an ELISA for the simultaneous detection of <i>Grapevine leafroll-associated virus 4, 5, 6, 7 and 9</i></b>	<b>296</b>
	Besse S., W. Bitterlin, P. Gugerli	
Poster 79	<b>Serological and molecular characterisation of <i>Grapevine leafroll-associated virus 2</i> variants occurring in Switzerland</b>	<b>299</b>
	Besse S., C. Balmelli, V. Hofstetter, P. Gugerli	
Poster 80	<b>Serological detection of <i>Grapevine leafroll associated viruses 1, 2 and 3</i></b>	<b>302</b>
	Cabaleiro C., A.M. Pesqueira, J.R. Pan, I. Cortez	
Poster 81	<b>Serological relationships between grapevine infecting ampelovirus from Argentina</b>	<b>304</b>
	Gómez Talquenca S., M. Lanza Volpe, C. Muñoz	
Poster 82	<b>Detection of leafroll GLRaV-1, 2 and 3 on grapevine rootstocks varieties</b>	<b>306</b>
	Beccavin I., M. Beuve, O. Lemaire, S. Grenan	
Poster 83	<b>Partial molecular characterization of <i>Grapevine leafroll associated virus-1</i> isolate from Iran</b>	<b>308</b>
	Roumi V., A.R. Afsharifar, K. Izadpanah	
Poster 84	<b>Genetic diversity of Portuguese isolates of <i>Grapevine leafroll-associated virus 1 (GLRaV-1)</i> based on the capsid protein</b>	<b>310</b>
	Esteves F., M. Teixeira Santos, M. De Lurdes Rocha, J.E. Eiras-Dias, F. Fonseca	
Poster 85	<b>Genetic variability of <i>Grapevine leafroll-associated virus 2 (GLRaV-2)</i> in a Portuguese vineyard, based on the HSP70h and capsid protein genes</b>	<b>312</b>
	Esteves F., M. Teixeira Santos, M. De Lurdes Rocha, J.E. Eiras-Dias, F. Fonseca	
Poster 86	<b>RFLP analysis of RT-PCR products to evaluate the genetic variability of CP ORF in GLRaV-2 isolates</b>	<b>314</b>
	Lanza Volpe M., O. Gracia, S. Gómez Talquenca	

Poster 87	<b>Assessment of GLRaV-3 variants occurring in Portuguese grapevine varieties according to the coat protein gene</b> Gouveia P., F. Esteves, M. Teixeira Santos, F. Fonseca, J.E. Eiras-Dias, G. Nolasco	316
Poster 88	<b>Grapevine leafroll disease in <i>Vitis vinifera</i> cv Mencía</b> Pesqueira A.M., R. González-Rodríguez, C. Cabaleiro	318
Poster 89	<b>Further data on the sensitivity of different rootstocks to the graft incompatibility associated with GLRaV-2 infection</b> Pirolo C., D. Boscia, P. La Notte, A. Cardone, G.P. Martelli	320
Poster 90	<b>Acquisition and transmission of GLRaV-1 (<i>Grapevine leafroll associated ampelovirus 1</i>) by <i>Planococcus citri</i> (Risso) (Hemiptera: Pseudococcidae)</b> Scotto C., B. Conti, A. Panattoni, E. Triolo	322

## Session IX – Rugose wood complex

Oral	<b>Invited lecture:</b> <b>Saldarelli P.</b> <b>Flexiviruses: a grapevine point of view</b>	324
	<b>Different variants of GRSPaV are associated to diverse diseases in grapevine</b> Borgo M., N. Bertazzon, F. Anaclerio, E. Angelini	327
	<b>Molecular characterization of biologically divergent strains of GRSPaV</b> Bouyahia H., M. Della Bartola, A. Materazzi, E. Triolo	329
	<b>Toward development of <i>Grapevine rupestris stem pitting-associated virus</i> into a VIGS vector</b> Meng B., C. Li, W. Wang	331
	<b>Characterisation of ORF5 of three South African <i>Grapevine virus A</i> variants as pathogenicity determinant in <i>Nicotiana benthamiana</i></b> Blignaut M., D. Stephan, J. Du Preez, S. Haviv, M. Mawassi, J.T. Burger	333
	<b>Towards the elucidation of <i>Grapevine virus A</i> ORF 2 gene function</b> Du Preez J., D. Stephan, D.E. Goszczynski, M. Muruganatham, M. Mawassi, J.T. Burger	336
	<b>Single domain antibodies for detection of GVB</b> Masri S., H. Rast, N. Habili	338
Poster 91	<b>Biological, serological and molecular characterization of <i>Grapevine virus A</i> isolates infecting vines in the Marche region, Central-Eastern Italy</b> Murolo S., D. Boscia, G. Romanazzi, V. Savino	341
Poster 92	<b>A novel vitivirus, <i>Grapevine virus E</i></b> Nakaune R., S. Toda, M. Mochizuki, M. Nakano	344

## Session X – Diseases of unclear etiology

Oral	<b>Viral sanitary status and genetic diversity of <i>Rupestris stem pitting associated virus</i> in French Syrah clones exhibiting various susceptibility levels to decline</b> Beuve M., B. Moury, A-S. Spilmont, L. Sempé-Ignatovic, C. Hemmer, O. Lemaire	346
Poster 93	<b>Preliminary investigations on a Syrah decline in Central Italy</b> Bianco P.A., A. Zorloni, C. De Biasi, G. Belli	348
Poster 94	<b>Shiraz disease and grapevine yellows in South Africa</b> Pietersen G., T. Oosthuizen, E. Jooste, L. Filippin, N. Bertazzon, E. Angelini	350
Poster 95	<b>Syrah decline: no evidence for viroid etiology</b> Renault-Spilmont A-S., L. Bernard, P. Serra, N. Duran-Vila	352
Poster 96	<b>Identification and partial characterization of grapevine viroids in Southern Iran</b> Zaki-Aghl M., K. Izadpanah	354
